# BEK03

My work is the result of recreations of my own feelings and sensations.

This multi-talented Venezuelan graffiti artist has been involved in industrial and graphic design, motion graphics and lately paintings and murals.

His dynamic artwork is inspired by street culture, graffiti and urban murals. He describes his creative process based on a deconstruction of elements that are part of the nature, their light and perspective. He sees beauty on imperfection.

Curiosity is his creative motto and it's fueled experimenting with the whole senses, recreating visions and images. The results can be funny, anguished, horrible and sometimes interactive.

He has participated on Ninja Show at Nucleos Art Gallery in Los Angeles, CA, Simple Chacao exhibition, Made by Venezuelans at Venezuelan Embassy in New York and on the book Writing by Gestalten.
